Among the list of the Acoustical Society's Gold Medalists, there is a recipient whose contributions to the Society are intriguingly summarized: "for fundamental contributions to physical acoustics and biomedical ultrasound and for innovative leadership in electronic publishing," Robert E. Apfel was the 2002 recipient of the Society's highest award.

### **Robert Edmund Apfel - Historical Biographies in Acoustics ...**

Acoustics was originally the study of small pressure waves in air which can be detected by the human ear: sound. The scope of acoustics has been extended to higher and lower frequencies: ultrasound and infrasound. Structural vibrations are now often included in acoustics. Also the perception of sound is an area of acoustical research.
