Kanban is the name given to the inventory control card used in a pull system. The primary benefit of kanban is to reduce overproduction, the worst of the seven deadly wastes. A true kanban system produces exactly what is ordered, when it is ordered, and in the quantities ordered. It is essentially a dynamic work order that moves with the material.

Kanban Came From Studying Supermarkets Stocking Food Kanban, which means signboard or billboard in Japanese, is a visual scheduling system for lean and just in time production. While some think of it as an inventory control system, it is more of a logistical chain control system. Like so many Lean Manufacturing ideas, it was invented at Toyota.
