Quality Center defines, manages and tracks functional, performance, and security test scripts in one place. It assigns business risk to requirements, and calculates where to apply testing resources. QA teams can emulate business processes, run tests unattended with QTP and execute manual and automated tests.

Test Management with Quality Center

HP Quality Center Environment Setup is a complicated process and it is NOT the usual installation that we carry out on a Windows operating system. Enterprise installation would be distributed, however for learning/evaluating purpose, one can install the trial version of HP-ALM 11.5x on a standalone server.
